

ABSTRACT

IMPROVEMENTS IN DRUG DELIVERY DEVICES

5 The invention relates to improvements in drug
delivery devices and particularly those for dispensing
a metered dose of medicament. Apparatus (10, 110) is
provided for dispensing medicament wherein at least a
portion of one or more of the internal surfaces of
10 components of the apparatus (10, 110) which come into
contact with the medicament during storage or
dispensing has a layer of one or more cold plasma
preliminarised monomers bonded to at least a portion
thereof.
